

Retail Sales Performance Analysis Report

Project Overview:

This project analyzes retail sales data to identify revenue trends, customer behavior, and regional performance. The objective is to generate business insights using Python for data-driven decision-making.

Key Performance Indicators (KPIs):

Total Revenue: 173920
Total Orders: 15
Average Order Value: 11594.67
Total Quantity Sold: 60

Business Insights:

- 1. Electronics category generates the highest revenue contribution.
- 2. West region demonstrates strong sales performance compared to other regions.
- 3. Monthly revenue shows consistent growth from January to March.
- 4. The average order value indicates healthy purchasing behavior.

Visual Analysis:

Conclusion:

The analysis highlights key revenue drivers and regional performance trends. Electronics products and the West region significantly contribute to total revenue. Such insights can support strategic decisions in inventory planning and targeted marketing.
